

Linda Kleinschmidt, M.Sc. | Business Development Manager

Linda Kleinschmidt is the Business Development Manager with DCTI. She worked for the DCTI as a Project Manager starting in 2010 when her primary expertise was the compilation of studies as well as the analysis of macro-economic models in the clean energy industry. Linda is particularly responsible for publicly awarded projects and was recently involved in the following studies:

- “BMU Consulting Fund for the German Climate Technology Initiative (DKTI): Climate Technology Market Study for Solar and Wind Energy” tendered by the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ)
- “Investments in the Production and Installation of Renewable Energy Plants in Germany” tendered by the Agentur für Erneuerbare Energien (AEE) and the German Renewable Energy Federation (BEE)
- “Analysis of the Potential for E-Mobility in the State of Bremen” tendered by the Bremen Economic Development

Linda studied Macroeconomics at Westfälischen Wilhelms University (Münster) with a particular focus in Econometrics-Statistics and Regional Corporate Cooperation.

Before joining DCTI, Linda was involved in several projects at economic research institutions including the Halle Institute for Economic Research (in the Structural Change Department) along with the Institute of Spatial and Housing Economics at Westfälischen Wilhelms University.
